

Sysmac Library for NJ/NX/NY Controller

SYSMAC-XR010

## Weighing Control Library

✓ Easily design weighing systems using load cells.

**Issue 1** Complicated programming is required to communicate with the weighing indicator and weighing controller.

**Issue 2** Writing programs for calibration, operation interface, and control in ladder is time consuming work.

## Weighing Control Library offers solution!

The weighing system using the NJ/NX/NY Controller and NX-IO eliminates the need for a communications program.

- The Function in this library easily converts to a display value
- The Function Blocks in this library control valves to discharge a constant quantity of the raw material

Weighing application using Sysmac Library  
(configuration of feed weighing system)

Eliminate variations in filling quantities

### Quantitative Discharging Control Function Block

Performs quantitative discharging control for feed weighing and discharge weighing.

### Fall Compensation Function Block

Performs fall compensation for quantitative discharging control.

NA Programmable Terminal

Reduce time required to build weighing/measurement system

### Display Value ConversionFunction

Converts a measurement value to a display value to be shown on the HMI.

### Interface

HMI screen templates to perform calibration, disconnection test, and control for feed weighing are available as samples.

Practices Guide for Sample Program & HMI Page Samples

Describes how to use sample programs and sample screens.

## Compatible Models

Name	Model	Version
Machine Automation Controller NJ/NX CPU Unit	NX701-□□□□ NJ101-□□□□	Version 1.10 or later
	NJ501-□□□□ NJ301-□□□□	Version 1.05 or later
	NX1P2-□□□□□□(1)	Version 1.13 or later
Industrial PC Platform NY IPC Machine Controller	NY5□□-1	Version 1.12 or later
Automation Software Sysmac Studio	SYSMAC-SE2□□□	Version 1.16 or higher
NX Load Cell Input Unit	NX-RS1201	Version 1.00 or later

## Function Block (FB)/Function (FUN) Specifications

Name	FB/FUN name	Description
Display Value Conversion	WC_WeightIndication	Converts a measurement value to a display value to be shown on the HMI.
Quantitative Discharging Control	WC_FixedWeightCtrl	Performs quantitative discharging control for feed weighing and discharge weighing.
Fall Compensation	WC_FallCompensation	Performs fall compensation for quantitative discharging control.
